

Maximum power,  
flexibility and safety.

**Air grinders and sanders**

Models: straight, angle and vertical  
Air turbine models: straight, angle

**Fiam**<sup>®</sup>  
PEOPLE AND SOLUTIONS

## Air grinders and sanders

# Fiam grinders and sanders: versatile, powerful, safe

Every manufacturing company needs to carry out more or less accurate surface finishing operations on its products. Compressed-air-powered grinders and sanders are used for this purpose. Ideal solutions for **grinding, deburring and rubbing, polishing, brushing, sanding** etc.

Fiam offers a range of air tools to meet the widest needs:

- **straight grinders:** with power from 90 to 500 Watts and speed from 12.000 to 100.000 rpm
- **vertical grinders:** with power from 2.350 to 2.400 Watts and speed from 6.000 to 8.500 rpm
- **angle grinders:** with power from 300 to 2.500 Watts and speed from 6.600 to 13.500 rpm
- **air turbine straight grinders:** with power from 50 Watts and speed from 70.000 rpm
- **air turbine angle grinders:** with power from 2.200 to 4.500 watts and speed from 6.600 to 12.000 rpm
- **vertical, straight and angle sanders:** with power from 300 to 375 Watts and speed from 1.700 to 13.500 rpm

The wide range of standard models shown on this catalogue only represents part of the solutions Fiam is able to offer. The skills of our expert technical staff combined with highly flexible manufacturing systems enable us to meet every request with **special customised solutions**.

SMY50D2

240SM180V

# Choosing the right Fiam grinder and sander

The technological parameters with the greatest influence on grinding and sanding operations are the **speed at which the tool** (shank, cup and depressed centre grinding wheels, rotary files, abrasive discs, brushes, etc.) rotates and the **power of the grinder or sander**, which are in their turn related to the **type of material** being worked and the

standard of finish required. The following table indicates the operations to be carried out and the tools used, to determine which is the best grinder or sander for your needs.

When making the choice, it is necessary to consider that the maximum speed of the grinder/sander **must not exceed** the speed shown on the abrasive tool.

Grinding and sanding operations demand special care, making it essential for the operator to read the **user manual** supplied with the tool thoroughly before installing, using, maintaining or repairing it.

In order to guarantee the best possible safety standards, besides from choosing a grinder or sander which complies with all the safety standards in force, as the case is with Fiam tools, it is also necessary to make sure that all the relevant **personal protective material** is used, such as protective glasses, dust masks, ear protectors, safety shoes and padded gloves etc.

OPERATION	TOOL	RECOMMENDED GRINDER AND SANDER					
		POWER WATT	FREE-TURNING SPEED rpm	STRAIGHT GRINDERS	ANG. GRINDERS/ SANDERS	VERT. GRINDERS/ SANDERS	AIR TURBINE ANG. GRINDERS
<b>GRINDING, SANDING</b>							
	RUSHED SHANK GRINDING WHEELS						
Small sanding, deburring, finishing etc..		50÷400	13.500÷70.000	●●●	●●		
	DIAMOND WHEELS						
Sanding, finishing, polishing etc.		50÷400	13.500÷70.000	●●●	●●		
	DISC GRINDING WHEELS						
Roughing, internal and external deburring etc.		500÷1.500	6.000÷12.000	●●●			
	DEPRESSED CENTRE DISCS						
Removing rust, lapping welding beads, chamfering etc.		300÷2.400	6.000÷13.500		●●	●●●	●●●
<b>MILLING</b>							
	ROTARY FILES						
Milling, chamfering, grooving, deburring etc.		50÷400	13.500÷70.000	●●●	●●		
<b>CUTTING</b>							
	DEPRESSED CENTRE DISCS						
Cutting off ingates, risers, castings, tubes, iron reinforced concrete, stones and cement etc.		300÷2.400	6.000÷13.500		●●	●●	●●●
<b>SANDING AND POLISHING</b>							
	FLEX. AND FLAP ABRASIVE DISCS						
Sanding bodywork, removing light rust, paint etc.		300÷375	1.700÷13.500		●●		●●
	RID-TEXTURED ABRASIVE DISCS						
Wet sanding of large areas of bodywork...		300÷375	max 4.500		●●

●●● Strongly recommended

●● Recommended

Be demanding

# Reliability

Long lifetime of the components thanks to careful design and quality of the production process which results in less maintenance and repair costs

The internal gears guarantee **constant performances** and **long lifetime of the tool**

The air motors employed ensure **long lifetime, high power and maximum output**

Tools are varnished with high quality materials that guarantee **thermal insulation and greater resistance to wear**

The maximum speed of the grinder or sander is related to the **recommended speed of the abrasive tool being used**. It is compulsory for the manufacturer of the tool to specify this speed, which must under all circumstances be respected to safeguard the safety of the operator and ensure the best possible results

## AIR TURBINE GRINDERS

These grinders allow to work in very difficult conditions in 24/7 operations: practically **they never stop**

**Grinder model 11SM10D** is very powerful and **extremely sturdy** thanks to the inner kinematic gears (double bearing on the output which supports the wheel shaft) which guarantee reliability over time

Don't be satisfied with the maximum

# Productivity

Great use effectiveness thanks to innovative design systems

**Extremely versatile**; they can be used:

- **STRAIGHT AIR GRINDERS:** with shank and disc grinding wheels, rotary files, diamond wheels, wire and radial brushes for grinding, deburring, rubbing down, grooving, removing, sanding etc.
- **ANGLE AIR GRINDERS:** for deburring, finishing, cutting, grinding operations etc.
- **VERTICAL AIR GRINDERS:** for cutting, grinding, cleaning and roughing operations etc.

## AIR TURBINE GRINDERS

- **Extremely powerful**, they are used for removing, scrubbing and leveling of cast-iron-parts, steel parts, welding seams, non-ferrous metals of all types, etc.
- Thanks to their extraordinary power, they reduce considerably the working times, **guaranteeing an extended longevity**
- Great production efficiency: material processing, also in very difficult conditions, is **faster than with traditional grinders**

- **ANGLE, VERTICAL, STRAIGHT AIR SANDERS:** for honing and clearing operations using flexible abrasive discs, adhesive abrasive paper, wire brushes etc. These tools are used for sanding bodywork, mechanical constructions, fibreglass, marble and wood, as well as for cleaning rust off painted surfaces. The sanders for wet work are used on large bodywork surfaces

The angle grinders (100SM125A, 250SM180A, 250SM230A models) and vertical grinders are equipped with a **speed governor** to obtain a constant work speed even during heavy work. In fact, this device prevents the grinder from exceeding the maximum possible speed

All air angle and vertical grinders (except for SMLES..., SMS..., SMY... models) have a practical "**disc locking**" device which guarantees extreme safety and eases disc replacement

250SM230A

100SM125A

SMS30DCZ

Perfection  
is in your hands

## Ergonomics

Optimization of the tool performances in regard to ergonomics and operator safety

The grip design and use of special light alloys make these tools **lighter and more handy**

The models with discs diam. of 180 and 230 mm are equipped with **disc holding device with balancing system that reduces the vibrations**

**Compact dimensions:** they are recommended for working in areas of limited space or difficult access

They have an **auxiliary grip** which permits a reduction of the reaction on the operator's hand making heavy works easier: the angle models have a side auxiliary grip; instead vertical models feature twin grips

They guarantee maximum handiness, thanks to the **good power/weight ratio**, reducing operator's fatigue

They are equipped with a particular **safety lever** as standard, to avoid the possibility of accidental start (except for straight models with starting with sliding or rotary valve). Therefore, they feature a safe starting system in compliance with the standards currently in force

SMT10D/CC and 11SM10D models feature a **starting nut** which enables the speed of the tool to be gradually increased until reaching its maximum

**Effective extraction devices** are available both for straight and angle grinders for removing the dust generated during work. These systems significantly reduce smoke and dust levels, considerably improving work conditions

Model 100SM125A and air turbine models are supplied with an **exhaust air conveyor** for greater operator's comfort

These tools are equipped with **silencing system** to reduce the noise level caused by the exhaust air

Where necessary, grinders and sanders are supplied as standard with wheel **guards complying**

### AIR TURBINE GRINDERS

For air turbine models, the auxiliary grip can be positioned on either side of the tool and it is made of anti-vibration materials

All angle models are equipped with disk protective carter adjustable with 180° rotation

Irrespective of their great power, they are extremely lighter than traditional models

Naturally  
innovative

## Ecology

Innovative systems designed paying even more attention with respect to environment and of its safeguard

The design of the inner kinematic motions optimizes the output of the available power, which is being transmitted with **minimum dispersions**

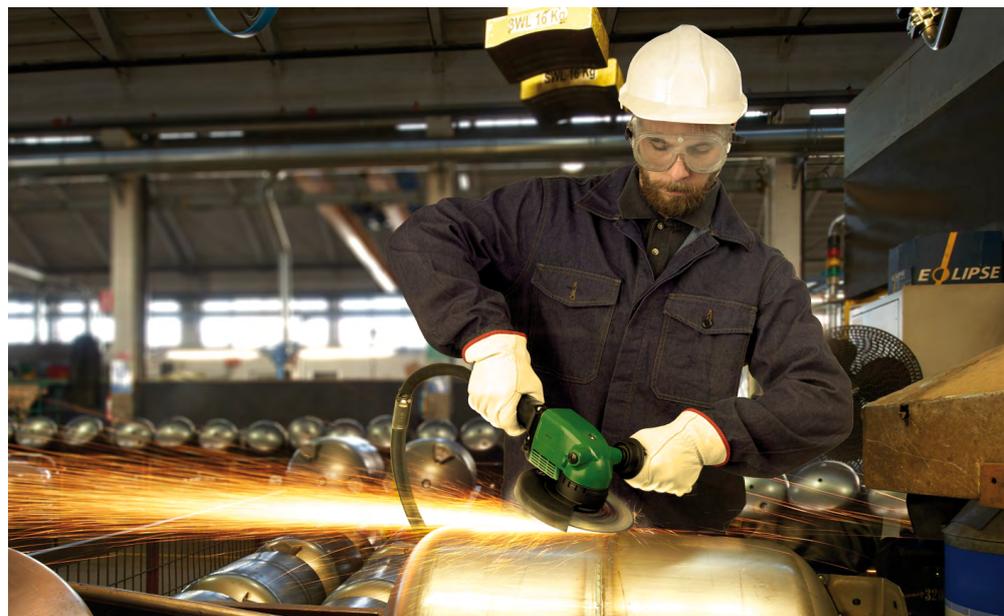

The grinders supplied with **speed governor** ensure reduced air consumptions; thanks to this, they maintain a constant work speed even during heavy work

All the components are easy to dispose of because they are built using **recyclable materials**; therefore they don't represent a pollution risk or a danger for personal safety

All Fiam products are supplied with **eco-friendly packaging**

### AIR TURBINE GRINDERS

They work **without lubrication**, only with dry air: an advantage which results in healthier environments **without emissions of nebulized oil and cleaner components, without oil residue** (a benefit, for example, in case of successive painting phases)

# Straight air grinders

**Straight  
air grinders**

**POWER:**  
from 90 to 500 rpm

**POWER:**  
from 12.000 to 100.000 rpm

**APPLICATION FIELD:**  
used with shank and disc grinding wheels, rotary files, diamond wheels, wire and radial brushes for grinding, deburring, rubbing down, grooving, removing, sanding etc.

# Angle and vertical air grinders

## Angle air grinders

**POWER:**  
from 300 to 2.500 Watt

**SPEED:**  
from 6.600 to 13.500 rpm

**APPLICATION FIELD:**  
used in a wide range of different applications, including deburring, finishing, cutting, grinding etc.

## Vertical air grinders

**POWER:**  
from 2.350 to 2.400 Watt

**SPEED:**  
from 6.000 to 8.500 rpm

**APPLICATION FIELD:**  
used for cutting, grinding, cleaning and roughing operations etc.

# Air grinders with turbine motor

**Air turbine straight grinders**

**POWER:**  
from 50 Watt  
**SPEED:**  
from 70.000 rpm

**APPLICATION FIELD:**  
precision mechanics: used in industry and precision mechanics industries, used with diamond wheels, rotary cutter with coupling for grinding, deburring, rubbing down

SMT10D/CC

**Air turbine angle grinders**

**POWER:**  
from 2.200 to 4.500 Watt  
**SPEED:**  
from 6.600 to 12.000 rpm

**APPLICATION FIELD:**  
for removing, scrubbing and leveling of cast-iron-parts, steel parts, welding seams, non-ferrous metals of all types

**Extremely more powerful than traditional air grinders:** the air turbine motor makes these tools very effective especially for operations in difficult conditions

**More powerful but lighter:** despite they are very powerful, the weight is reduced compared to traditional air grinders

**They ensure an extraordinary working continuity in 24/7 operations.** The productive efficiency also involves the consumption: as the work is performed faster, the total consumption of energy is significantly lower for each application

**Ergonomics and safety guaranteed:** in addition to the excellent power to weight ratio, they are equipped with several accessories that reduce vibrations and fatigue for the operator

- disk balancing system
- auxiliary grip which can be positioned on either side of the tool, made of anti-vibration materials (modd. 450 SMT..)
- disc lock button easing accessory replacement

Ø 16,5 mm	170	662031170	LEN...

#### Other technical features

Models	Air inlet	Recommended hose bore	Supply hoses recommended*
SMLES 125, LES...	1/4" gas F	Ø mm 9,5 x 15,9	693511022
LEN..., LES30SP	1/2" gas F	Ø mm 12,7 x 19,8	693511024

\* For features of hoses see page 15

## Collets for straight grinders

### Collets for 9SM03DT

Ø collet hole mm	Code
1	660311100
1,1	660311110
1,2	660311120
1,4	660311140
2	660311200
2,35	660311235
2,5	660311250
3,175	660311318

### Collets for SMZ15D

Ø collet hole mm	Code
1	660421010
1,5	660421015
2	660421020
2,5-3/32"	660421025
3	660421030
3,5-1/8"	660421035
4	660421040
4,5	660421045
5-3/16"	660421050

Collet tightening capacities: 0,5 mm

### Collets for SMS30... and SMLES135

Ø collet hole mm	Code
1	660431010
1,5	660431015
2	660431020
2,5-3/32"	660431025
3	660431030
3,5-1/8"	660431035
4	660431040
4,5	660431045
5-3/16"	660431050
5,5	660431055
6	660431060
6,5-1/4"	660431065
7	660431070

Collet tightening capacities: 0,5 mm

### Collets for SMT10D/CC

Ø collet hole mm	Code
2,38 (3/32")	660312230
3	660312301

### Collets for SMY50...

Ø collet hole mm	Code
1	660441010
1,5	660441015
2	660441020
2,5-3/32"	660441025
3	660441030
4-1/8"	660441040
5-3/16"	660441050
6	660441060
7-1/4"	660441070
8-5/16"	660441080
9	660441090
10	660441100

Collet tightening capacities:

- from 1 to 3 mm = 0,5 mm
- over 3 mm = 1 mm

### Collets for 11SM10D

Ø collet hole mm	Code
3	660312302
2,38 (3/32")	660312320
3,17 (1/8")	660312321

## FRL Group - Filter, pressure regulator, lubricator

The FRL group is recommended for filtering, regulating and lubricating the compressed air supply for air tools. This system eliminates solids and humidity while supplying a precise air flow and suitable lubrication. Where necessary, it is indicated for obtaining the required torque values by adjusting the pressure of the air supply.

Threaded attack	Flow rate l/s	Complete assembly Code	Reduction compl. of gauge Code	Lubricator Code
1/4" gas	1,7 ÷ 16	697331020	697331025	697281020
3/8" gas	4,2 ÷ 20	697351020	697351025	697291020
1/2" gas	8 ÷ 43	697371020	697371025	697301020
3/4" gas	15 ÷ 73	-	697181110	-

## Rubber supply hoses with couplings

Rubber supply hoses with coupling made with inner duct in synthetic rubber and high resistance reinforced textile chaise.

They can be used with compressed air, water, cutting oil and antifreeze liquids. They are extremely flexible and versatile and above all safe and resistant in time.

To choose the most suitable supply hose, see pages 7, 9 and 13.

Hoses with different lengths are available upon request.

Please contact Fiam Technical Assistance Service

Hose mm Ø internal x Ø external mm	Length mm	Male coupling	Female coupling	Code
4,8x9,4	3000	1/8" gas M	1/4" gas F	693511020
6,3x12,7	3000	1/4" gas M	1/4" gas F	693511021
9,5x15,9	3000	1/4" gas M	1/4" gas F	693511022
9,5x15,9	3000	3/8" gas M	3/8" gas F	693511023
19x24	4000	1/2" gas M	1/2" gas F	693511031

## Quick coupling and nipples

To choose the most suitable quick coupling, refer to pages 7, 9 and 11.

Male

Female

Recommended hose bore	Air inlet threading	Male quick coupling Code	Female quick coupling Code
Ø 5 mm	1/8" gas	695411018	695431018
Ø 6 mm	1/4" gas	695411014	695431014
Ø 8 ÷ 10 mm	1/4" gas	695411114	695431114
Ø 13 mm	3/8" gas	695411138	695431138
Ø 16 mm	1/2" gas	695411212	695431212

To choose the most suitable quick nipples refer to pages 7, 9 and 11.

Male

Female

Recommended hose bore	Air inlet threading	Male quick coupling Code	Female quick coupling Code
Ø 5 mm	1/8" gas	695311018	695331018
Ø 6 mm	1/4" gas	695311014	695331014
Ø 8 ÷ 10 mm	1/4" gas	695311114	695331114
Ø 13 mm	3/8" gas	695311138	695331138
Ø 16 mm	1/2" gas	695311212	695331212

## Flexible couplings

These light and compact couplings improve the operators' working conditions; they prevent twisting of supply hoses and reduce vibrations.

Model	Coupling F/M	Code
RS 25 FM	1/4"	695091015
RS 30 FM	3/8"	695091020

## Exhaust air hose conveyors

Used to drive away the tool exhaust air from the operator and therefore making the workplace more ergonomical.

For models	Code	
SMZ15D	693751013	
SMS30..., SMLES135, SMS100A, LES...	693751002	
SMY50..., SMY115A, LEN...	693751003	

## Lubricating oil for air tools

Used to lubricate the internal components of the motor group.
